MID-IOWA
MIPA
PLANNING ALLIANCE
FOR COMMUNITY DEVELOPMENT

MID-IOWA
COMPREHENSIVE
ECONOMIC
DEVELOPMENT
STRATEGY 2021
INTRODUCTION

1
The Mid-Iowa Planning Alliance for Community Development (MIPA) was created in August 2021 for the purpose of supporting the economic development activities in Boone, Dallas, Jasper, Marion, Polk, Story, and Warren Counties.
The Mid-Iowa Comprehensive Economic Development Strategy (CEDS) represents a shared vision for economic growth within the seven-county Mid-Iowa region. The intent of the CEDS is straightforward: create jobs, diversity the economy, improving living conditions, and improve the region’s resiliency.

To help Mid-Iowa forge a path forward, the CEDS dissects the region’s demographics and economic indicators; documents the region’s strengths, weaknesses, opportunities, and threats; and lays out the region’s goals and priorities.

A CEDS is a requirement to apply for assistance under the Economic Development Administration’s (EDA) Public Works and Economic Adjustment programs. MIPA will seek assistance once designated as the Economic Development District (EDD) for Mid-Iowa.

As an EDD for the region, MIPA will play an important supporting role in local economic development, fostering collaboration between the region’s local jurisdictions, economic development organizations, and the EDA. The EDD helps support regional priorities for projects and investments.

MIPA would be responsible for updating and submitting a new CEDS every five years. MIPA will offer communication and outreach to the region in order to take full advantage of the resources and support of the Economic Development Administration and other supporting entities.

The CEDS document will be readily available for the public and stakeholders to review and consult. As a public document, the CEDS can be utilized as a guide to the regional economy as local decision makers endeavor to improve it.
CEDS Steering Committee
The creation of this CEDS was overseen by a Steering Committee, comprised of 29 stakeholders. All seven counties were represented.

Members had various backgrounds. Some were elected officials, while others were economic development staff at local jurisdictions. Still others were from private groups such as chambers of commerce or economic development corporations. They met monthly.

Stakeholder Input Sessions
Staff met with various stakeholders throughout the process. Notably, a stakeholder session was organized virtually and attended by nearly 60 stakeholders of various backgrounds in the public and private sectors. A SWOT analysis session was facilitated, as was a goal-setting discussion.

Stakeholder Survey
Regional stakeholders were asked via online survey to provide feedback on a draft SWOT analysis and Goals. The survey was completed by 76 stakeholders.

Public Comment Period
Finally, a 30-day public-comment period was held where stakeholders could review the CEDS document and provide feedback. This included a public meeting held August 24.

Adoption
The CEDS was adopted by the Steering Committee and MIPA Board of Directors in early September.

POPULATION & DEMOGRAPHICS
Pappajohn Sculpture Park, Polk County
Mid-Iowa is comprised of seven counties: Boone, Dallas, Jasper, Marion, Polk, Story, and Warren. The region’s total population was 631,492 in 2000 and has grown to 810,241 in 2019.

Overall, from 2000 to 2019, the MIPA region experienced a greater percentage of population growth (28.3%) than both Iowa (7.3%) and the United States (15.4%).

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table B01002
The Mid-Iowa region has a gender distribution similar to that of Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S0101
Mid-Iowa is somewhat more diverse than the state of Iowa, with a slightly smaller percentage of White alone population and a slightly larger percentages of Black or African American alone and Asian alone populations. Compared to the United States, Mid-Iowa is less diverse, with a larger percentage of White alone population and a smaller percentage of non-white populations. Within the MIPA seven-county region, Polk, Story, and Dallas Counties are among the most diverse in population.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table B02001
HISPANIC OR LATINO

Mid-Iowa’s proportion Hispanic or Latino population is similar to Iowa’s proportion, but lower than the United States’ proportion.

Within Mid-Iowa, Polk and Dallas Counties have the largest proportions of population with Hispanic or Latino origin.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table B03002
Most counties in Mid-Iowa have roughly similar average household sizes compared to Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1101
MINORS / SENIORS IN HOUSEHOLDS

Compared to Iowa and the United States, Mid-Iowa has a higher proportion of households within one or more people under 18 years, while a lower proportion of households with one or more people 60 years and over.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1101
Mid-Iowa has a lower proportion of households living in owner-occupied housing than in Iowa – but higher than the United States. Conversely, the region has a higher proportion of households living in renter-occupied housing than in Iowa – but lower than the United States.

Mid-Iowa has a lower percentage of vacant housing units than the state of Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1101
Mid-Iowa has lower vacancy rates than Iowa or the United States among owner-occupied housing and renter-occupied housing.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table DP04
The mean household income in Mid-Iowa is higher than in Iowa – but about the same as the United States. Mean household income varies by county, with Dallas County having the highest and Jasper County the lowest.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1901
Housing units in Mid-Iowa are fairly newer in construction. More than half of the housing units were built after 1970, and slightly more than a quarter were built after 2000.

Dallas County has the largest percentage of newer housing units with more than half of the total housing units constructed after 2000. Boone, Jasper, and Marion Counties have the largest percentage of older housing units built 1939 or earlier.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table DP04
Monthly owner costs of housing are somewhat more affordable in Mid-Iowa than in Iowa or the United States. For housing units with a mortgage, more than half of the region’s housing units in Mid-Iowa and Iowa have monthly owner costs that are less than 20 percent of household income. Conversely, the United States has more than a quarter of housing units with mortgages where monthly owner costs are 30 percent or more of household income compared to only around 20 percent in Mid-Iowa. For housing units without a mortgage, the distribution of monthly owner costs as a percentage of household income is similar in Mid-Iowa as with Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table DP04
The Mid-Iowa region faces challenges with affordability when the costs of housing and transportation are viewed together, as indicated by the H+T Affordability Index.* The Index defines affordability as the combined costs of housing and transportation being at or below 45% of household income. In Mid-Iowa, most households exceed the 45% threshold.

* The Regional Typical Household assumes the median household income in the region, average household size in the region, and average commuters per household in the region.

The Regional Moderate Household assumes a household income of 80% of the regional median, the regional average household size, and the regional average commuters per household.

The National Typical Household assumes a household income of $61,828 (national median household income), national average household size of 2.72, and a national average number of commuters per household of 1.22.

Source: Housing & Transportation Index
The poverty rate in Mid-Iowa is lower than both the rate in Iowa and the United States.

Story County has the highest poverty rate due to the large number of students at Iowa State University.

Polk County has the next highest poverty rate, while Dallas County has the lowest poverty rate.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1701
HEALTH INSURANCE

The Mid-Iowa region and the state of Iowa have similar percentages of the population with health insurance. Both have a larger percentage of the population with health insurance than the United States.

Boone, Jasper, and Warren Counties have the highest percentage of the population with health insurance within the Mid-Iowa region.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S2701
The share of adults in Mid-Iowa self-reporting themselves in poor to fair health has increased slightly in the past five years – similar to Iowa and outperforming the United States.

Mid-Iowa has mostly expanded access* to exercise opportunities in the last several years, though Dallas County saw a decrease in access. Mid-Iowa performs similarly with Iowa, and both underperform compared to the top performers in the United States.

* Proximity is defined as within half a mile of a park in a census block, or within one mile of a recreational facility in an urban census block, or within three miles of a recreational facility in a rural census block.

Source: County Health Rankings, University of Wisconsin Population Health Institute.
COUNTY HEALTH RANKINGS

The Mid-Iowa region has seen an improvement in its access to food over the past several years, as measured by the Food Environment Index*.

Current top performers in the region are Dallas County and Warren County.

Most recently, Mid-Iowa has not only performed better than Iowa but ranks among the top performers in the United States.

Source: County Health Rankings, University of Wisconsin Population Health Institute.
The percentage of adults ages 20 and over reporting no leisure-time physical activity in the Mid-Iowa region is similar to Iowa and of the most active areas in the United States. Boone, Jasper, and Marion Counties have highest amounts in the region.

Boone, Dallas County, and Jasper County have the highest adult obesity rates in the Mid-Iowa region. Both have higher rates than the top performing areas in the United States. Story and Dallas Counties have the lowest rates in Mid-Iowa.

* The Adult Obesity metric is the percentage of the adult population age 20 and older with a body mass index (BMI) greater than or equal to 30 kg/m² based on self-reported height and weight. Responses are from the Behavioral Risk Factor Surveillance Survey (BRFSS). The metric also serves as a proxy measure for poor diet and limited physical activity.
The Mid-Iowa region is relatively well educated.

The percentage of the population aged 25 years and over with less than a high school diploma in the region is smaller than in Iowa and in the United States.

Conversely, the percentage of the population aged 25 years and over with at least an Associate's degree is higher in the region than in Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1501
Earnings

The average median earnings in Mid-Iowa region is fairly comparable to the median earnings in Iowa and in the United States.

Within the region, Boone and Jasper Counties have the lowest median earnings, while Dallas and Warren Counties have the highest median earnings.

Unlike the United States, the average median earning for those with a graduate or professional degree in Mid-Iowa is less than the median earnings of those with graduate or professional degrees in the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1501
There are differences in median earnings by educational attainment in the region.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1501
Mid-Iowa has somewhat lower enrollments in primary and secondary education but somewhat higher enrollments in post-secondary education compared to Iowa and the United States.

Story County stands out among the region for having a lower percentage enrollment in kindergarten to 12th grade – but the highest enrollment in undergraduate college and graduate or professional school.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table S1401
The Mid-Iowa region has slightly higher percentages of households with a computer and with broadband internet subscription than Iowa and the United States.

Source: American Community Survey (ACS) 5-Year Estimates 2019 Table DP02
Mid-Iowa's use of broadband Internet is similar to that in Iowa and the United States, according to Microsoft’s measurements. However, broadband usage varies within the Mid-Iowa region; the most urbanized areas have the highest usage of broadband.

* The dataset combines information on county populations with an estimate of broadband usage over multiple Microsoft services in November 2019. Every time a device using Microsoft software receives an update or connects to a Microsoft service, Microsoft is able to estimate the device’s throughput speed based on the size of the packet sent and the time it takes to download. Using this information, Microsoft was able to provide an estimate of the percentage of the population using broadband (25 Mbps download speeds or higher) in each county. Microsoft estimates that ~157 million people in the US are not using the Internet at broadband speeds.

Source: Microsoft
The Mid-Iowa region has had a steady labor force participation rate for the recent several years from 2015 to 2019. Dallas and Polk Counties stand out as having higher labor force participation rates, while Jasper County stands out as having lower labor force participation rates.

Source: American Community Survey (ACS) 5-Year Estimates 2016 Table S2301
Unemployment rates in the Mid-Iowa region have been decreasing for the most recent several years and have remained well below the national unemployment rate. With the outbreak of the COVID-19 pandemic, unemployment rates have sharply increased.

Source: U.S. Bureau of Labor Statistics
The Mid-Iowa region has higher employment in management, business, science, and arts occupations than Iowa and the United States.

Compared to Iowa and the United States since 2010, the region has experienced more decline in sales and office occupations but larger increases in management, business, science, and arts occupations and in production, transportation, and material moving occupations.

Source: American Community Survey (ACS) 5-Year Estimates 2010 Table C24050
Jobs

Mid-Iowa’s employment distribution is comparable to Iowa and United States. Mid-Iowa has lower employment in construction, manufacturing, transportation, warehousing, and utilities. However, the region has higher amounts of employment in the finance and insurance, real estate, and rental and leasing industry.

Since 2010, employment in most industries within Mid-Iowa has remained relatively consistent. There were losses in employment in the information, finance and insurance, real estate, rental and leasing, and public administration industries.

However, there were also gains in employment in the professional, scientific, management, administrative, and waste management services industry and the educational services, health care and social assistance industries.
The percentage of employers with employee retention efforts in Region 11 of Iowa Workforce Development (which includes Mid-Iowa counties plus Madison County) and in Iowa were the same, with the top five employee retention efforts being: flexible work schedules, changes in duties/responsibilities, increased wages or bonuses, comprehensive benefits package, and seasonal work schedules.

Source: Iowa Workforce Development 2019 Workforce Needs Assessment
Most occupations are forecast to grow within Region 11 of Iowa Workforce Development, which includes the Mid-Iowa counties plus Madison County. The most growth is expected to occur in Personal Care and Services, Healthcare Support, and Community and Social Services.

Source: Iowa Workforce Development
Real Wage Trends

Real wages in Mid-Iowa have grown over the past two decades at a similar pace similar to Iowa’s. Dallas County experienced the largest real wage growth, while Jasper County experienced a decrease in real wages.

Annual Average Wage in 2020 Dollars
(Midwest CPI Adjusted)

Source: Iowa Workforce Development
Unemployment Duration

Since 2000, the number of unemployment insurance recipients in the Mid-Iowa region have generally followed national economic trends.

With the Recession of 2008/2009, unemployment insurance recipients in the region increased to 34,677 in 2010 before decreasing to 20,314 in 2019 with the post-Recession recovery.

With the COVID-19 pandemic, the number of unemployment insurance recipients greatly increased in both the region and in Iowa.

Source: Iowa Workforce Development
The Mid-Iowa region is an employment attractor, experiencing a net inflow of jobs for the most recent two decades. In 2018, most of the population in the was living and employed within the region, and the inflow of employment was nearly double the outflow of employment.

Interior Flow Job Characteristics

In 2018, workers living and working within the Mid-Iowa region were mostly middle aged from 30 to 54, earning higher monthly incomes of more than $3,333 per month, and employed in the other services industry. Since 2002, workers living and working within the region have remained relatively consistent, with the exception of an increase in older workers aged 55 or older and workers with higher monthly incomes making more than $3,333 per month, and a decrease of middle-aged workers from 30 to 54 and those making between $1,251 to $3,333 per month.

Transportation to Work

The mean travel time to work across the Mid-Iowa region by different modes of transportation.

Generally, it is less than 30 minutes. In many areas it is around 20 minutes.

Work commutes in the is a few minutes shorter than the national average.

Source: American Community Survey (ACS) 5-Year Estimates 2019, 2016, 2014 Table S0802
Transport Portfolios

The Mid-Iowa region is served by a variety of transportation modes. The region hosts eight civil public use airports, including two in Jasper County, two in Marion County, and one each in Boone, Dallas, Polk, and Story Counties. There is also one primary and commercial airport, the Des Moines International Airport in Polk County.

The region also has about 356 route miles of freight railroad and about 183 centerline miles of the primary and non-primary national highway freight network.

Source: U.S. DOT Bureau of Transportation Statistics County Transportation Profiles
**What are clusters?**

A cluster is a grouping of related industries in a particular location.

Researchers from US Cluster Mapping defined clusters from US industry codes with significant inter-industry linkages based on input-output measures, labor occupations, and co-location patterns of employment and establishments.

There are two types of clusters for a regional economy, Traded Clusters and Local Clusters. Both are necessary for a regional economy.

**Traded Clusters**

Traded clusters are groups of related industries that serve a market beyond the immediate region where they are located. Traded clusters provide higher wages and higher levels of innovation and are concentrated in specific regions that offer competitive advantages.

**Local Clusters**

Local clusters are groups of related industries that serve the market in their immediate region. Local clusters provide most of the employment and employment growth as well as the necessary services to support traded clusters and are located in every region.

**Mid-Iowa**

Mid-Iowa is composed of 61% local and 39% traded clusters. Of the 52 traded clusters, Mid-Iowa is the strongest in 16:

- Business services
- Insurance
- Distribution and ecommerce
- Financial services
- Education
- Production technology
- Transportation
- Marketing
- Food processing
- Livestock
- Printing
- IT
- Vulcanized materials
- Performing arts
- Upstream chemicals
- Environmental services.
LOCAL CLUSTERS:
Top 10 Highest Employment

The Local Clusters with the most jobs are shown here, with the Top 10 illustrated by their proportionality at the right. All together, these clusters account for approximately 216,000 jobs in Mid-Iowa.

LOCAL CLUSTERS:
Top 10 Highest Wages

The Local Clusters with the highest wages are shown here, with the Top 10 illustrated by their proportionality at the right. Average annual wages for these clusters range from approximately $28,000 to $63,000.

TRADED CLUSTERS:
Top 10 Highest Employment

The Traded Clusters with the most jobs are shown here, with the Top 10 illustrated by their proportionality at the right. All together, these clusters account for approximately 124,000 jobs in Mid-Iowa.

The Traded Clusters with the highest wages are shown here, with the Top 10 illustrated by their proportionality at the right. Average annual wages for these clusters range from approximately $58,000 to $88,000.

Both kinds of clusters – Local and Traded – are necessary for the regional economy. Here, their interconnection can be seen through the many linkages between clusters various Local and Traded Clusters.

National Risk Index

The National Risk Index (NRI) was developed by the Federal Emergency Management Agency (FEMA) and its partners to provide a relative risk measure for 18 natural hazards. The risk measure is based on three components:

- **Expected Annual Loss** is the dollar loss from building value, population, and/or agriculture exposure each year due to natural hazards. In Mid-Iowa, Polk County is Relatively High, while the others are Relatively Low or Relatively Moderate.

- **Social Vulnerability** is the susceptibility of social groups to the impacts of natural hazards. The Mid-Iowa region is deemed Very Low or Relatively Low.

- **Community Resilience** is the ability of a community to prepare for anticipated natural hazards, adapt to changing conditions, and withstand and recover rapidly from disruptions. Mid-Iowa ranks high in Community Resilience, with all counties being rated Very High or Relatively High.
Mid-Iowa is susceptible to 14 of the 18 natural hazards identified by FEMA. Almost all these risks are deemed Very Low, Relatively Low, or Relatively Moderate. Only Polk County is at Relatively High Risk for Strong Winds.

Mid-Iowa Land Cover

Mid-Iowa is a mix of agricultural land, developed areas, and natural landcovers, according to the U.S. Department of Agriculture.*

- **Agriculture** remains the predominant land use despite decreases over the past 20 years, occupying about 74% of the land today. This includes alfalfa, barley, canola, clover, wildflowers, corn, soybeans, sorghum, fallow cropland, grapes, pasture, millet, oats, peas, rye, sod, grass seed, spring wheat, sweet corn, switchgrass, triticale, and winter wheat.

- **Developed areas** occupy about 10% of the land area and have increased over the past 20 years. Development land cover includes open space, low-density, medium-intensity, and high-intensity development.

- **Natural land cover** includes barren, forest (deciduous, mixed, or evergreen), shrubland, and wetlands (woody or herbaceous).

* The United States Department of Agriculture (USDA)’s Cropland Data Layer (CDL) provides acreage estimates of land cover data from satellite imagery.

Source: USDA National Agricultural Statistics Service Cropland Data Layer.
The data from the previous sections begin to paint a picture of the region’s economy. To better complete the picture, MIPA sought the insights and understandings of stakeholders who have a deep familiarity with the regional economy.

MIPA convened a stakeholder session with nearly 50 attendees, all of whom played various roles with economic development at cities, counties, economic development offices, or chambers of commerce, as well as elected officials. The stakeholders conducted an analysis of the region’s Strengths, Weaknesses, Opportunities and Threats (aka SWOT Analysis).

These discussions formed the basis of drafting this section.
Key Takeaways from the SWOT Analysis

• Location, including the option to live in rural, suburban, or urban communities, with access to a variety of amenities, transportation networks, and the state capital.

• Hard-working, highly engaged workforce, which is the most populous and fastest growing in the state, many highly educated, with a diversity of skillsets.

• A community-minded culture, with highly engaged and accessible civic leadership, strong economic development organizations, and talent for public-private partnerships.

• Quality public schools and an array of institutions of higher education.

• Affordable cost of living.

• Quality of life amenities, notably the network of paved trails, rivers and creeks, parks, entertainment and cultural amenities, and safe communities, to name a few.

• Rich in resources, such as an abundance of water, access to low-cost renewable energy and low-cost natural gas; as well as certified sites and available buildings.
WEAKNESSES

Key Takeaways from the SWOT Analysis

• Aging infrastructure.
• Declining rural downtowns.
• Lack of transportation options in rural areas.
• Corporate taxes and property taxes can be a barrier to economic development.
• Insufficient workforce to meet demand, in terms of quantity of people and level of skills training.
• Lack of affordable living, from housing to daycare to public transit.
• Poor water quality.
• Low population growth in rural areas.
• Lack of broadband throughout the region.
• Shortage of cultural amenities to attract and retain young people.
OPPORTUNITIES

Key Takeaways from the SWOT Analysis

• Reinvestment in “Main Streets” and commercial districts to retain and attract small businesses.
• Placemaking throughout region to retain and attract workforce.
• Industry clusters with national reputations to build upon and expand.
• Apprenticeships and internships to expose students and parents to trades and skilled labor.
• Succession planning to preserve existing businesses and provide opportunities to new businesspeople.
• Continued investments in transportation infrastructure and regional trail systems.
• Renewable energies and abundant water as attractive resources for companies.
• Broadband access throughout region to expand options for employers and employees.
Key Takeaways from the SWOT Analysis

• High vacancy rates among office space due to the pandemic.
• Lack of sufficient workforce, in terms of quantity and level of skills training.
• Rising material prices affecting housing costs.
• Declining investment in public educational institutions, increasing costs of educations.
• Lack of succession plans.
• Degradation of water quality.
• Inadequate or deteriorating infrastructure (e.g., broadband, aging buildings and roads).
• Divisive politics, competing rural-urban interests, weakening of local government.
• Autonomation and algorithms replacing jobs.
• Rural population decline.
• Uncertainty about pandemic recovery.
• Global financial and supply chain disruptions.
• Violent crime.
• Attempts to limit uses of Tax Increment Financing.
• Natural disasters including flooding, tornados, derechos, drought, etc.
Regional Assessment

Community Survey

An online survey was then distributed to the stakeholders and communities within the seven-county region.

The survey asked 24 questions seeking feedback on a draft SWOT Analysis and Goals. Specifically, the survey sought to draw out the region's priorities. What are the biggest strengths? Weaknesses? Opportunities? Threats? The survey also asked for feedback on the draft goals – and to rank them from highest to lowest priority. The survey was completed by 76 stakeholders and reviewed by the CEDS Steering Committee.

Thus identified, the region's priorities are reflected here.

- City in Mid Iowa.
- County in Mid Iowa.
- Economic development organization in Mid Iowa.
- Private business in Mid Iowa.
- Developer in Mid Iowa.
- Investor in Mid Iowa.
- Non-Profit, Planning and Zoning in Pella, IA, Community Member
- Economic Engine serving most of Iowa
## THEMES
Biggest Strengths, Weaknesses, Opportunities and Threats

### STRENGTHS
Location was the most visible theme, with top ranking for:
- Option to live rural or urban
- Affordable cost of living
- Community mindedness
- Quality of life amenities

### WEAKNESSES
An insufficient workforce was a top-ranked weakness. The built environment ranked highly:
- Aging infrastructure
- Lack of affordable living
- Declining rural downtowns
- Broadband

### OPPORTUNITIES
Many ranks for improving the built environment, in order of votes:
- Main street investments
- Broadband
- Placemaking
- Transportation and trails
- Support for workforce and business
- Apprenticeships and internships
- Succession planning for businesses

### THREATS
An insufficient workforce was seen as the biggest threat.
Several threats also identified in the built environment, including:
- Rising materials costs driving up housing costs
- Inadequate or deteriorating infrastructure
- Divisive politics also rose to the top of perceived threats.
SUMMARY

The regional assessment revealed the attributes of Mid-Iowa and attitudes of the stakeholders who call it home. A strong pride of community as a great place to live life. A determination to make the region’s places even better. A desire for more workforce. A sense of stewardship for our built and natural environments.
5 RESILIENCY
One of the best strategies for ensuring resiliency of the Mid-Iowa region is to anticipate and prepare for the range of potential disasters. For MIPA, that means supporting and encouraging a range of activities by its member jurisdictions:

- Engage in pre-disaster recovery and mitigation planning.
- Encourage concepts and principles of economic resiliency strategies into existing plans and activities.
- Regularly assess communities' risks and vulnerabilities.
- Inventory and organize the community’s recovery resources.
- Engage in business continuity planning.
- Ensure resources are available for the elderly and those with special needs.
- Identify shelters.
- Identify recovery partners, as well as the type of assistance and resources they can provide.
- Establish a timeline for recovery activities (immediate, short-term, intermediate, and long-term).
- Develop and disseminate a community evacuation plan.
- Establish a communication chain.
- Engage the community’s residents in the planning and recovery process.
- Convene neutral forum to facilitate discussion on economic resiliency preparedness among diverse stakeholders.
The previous sections, notably the Economic Indicators and Regional Assessment, reveal the areas of the regional economy that are robust and resilient – as well as those that are fragile and susceptible to disruption.

To improve the overall resiliency of the regional economy, the region’s vulnerabilities are identified here for further examination:

- **Economic Challenges** relating to workforce and infrastructure are could further exacerbate the Mid-Iowa region’s efforts to further its economic development.
- **Natural Disasters** have taken a significant toll on the Mid-Iowa region in recent years and are an ever-present reality that needs to be taken into account.
- **Degradation of Natural Resources** stand to complicate the region’s efforts to sustain its economic development gains.
ECONOMIC CHALLENGES

Several economic challenges stand out as vulnerabilities to the region. Notable among them are the following:

• **A lack of workforce** was repeatedly identified by stakeholders as a critical issue to the region. Without more workers, companies can’t add jobs, and economic growth is hindered.

• **Under-qualified workforce** was also referenced by stakeholders as a barrier to growing companies and expanding the regional economy.

• **Inadequate workforce housing** is a persistent issue across the Mid-Iowa region, a fundamental need without which growth is hampered.

• **Lack of broadband** across the region is a barrier to growing the economy in parts of Mid-Iowa.

• **Aging infrastructure** has been an ever-present economic challenge for local jurisdictions.

RESILIENCE STRATEGIES

• Support efforts to attract and retain workforce, notably quality-of-life amenities.

• Support efforts to up-skill the workforce, such as training programs and centers.

• Support efforts to “future-proof” infrastructure that is critical to the economy.
NATURAL DISASTERS

As noted in the Economic Indicators section, Mid-Iowa is susceptible to 14 of the 18 natural hazards identified by FEMA, including Cold Wave, Drought, Earthquake, Hail, Heat Wave, Hurricane, Ice Storm, Land Slide, Lightning, Riverine Flooding, Strong Wind, Tornado, Wildfire, and Winter Weather.

Most of these risks are deemed Very Low, Relatively Moderate, or Moderately High.

Still, it is important for the region’s economic resilience to understand these risks and be prepared to adequately respond to natural disasters when they happen.

RESILIENCE STRATEGIES

• Work with emergency managers to address the risks identified through hazard mitigation planning.

• Employ measurements to regularly assess the regional economy.
COVID PANDEMIC

Mid-Iowa is not immune to the significant economic disruption caused by pandemics, as the region is experiencing as it recovers from the COVID-19 pandemic. For MIPA, this means a redoubled commitment to the regional economic recovery by working with its member jurisdictions and partner organizations in numerous ways:

• Emphasize community resilience.
• Support the return and revitalization of main streets, business districts and rural economies.
• Ensure the communities are appealing and healthy places to live and work.
• Emphasize the importance of communities being welcoming and providing environments safe from COVID, and therefore perceived as more desirable destinations.
• Connect member jurisdictions with stimulus money, capital, and business assistance resources for business creation, expansion and retention.
• Assist member jurisdictions with workforce development and education and training opportunities in post-COVID environment.
• Develop a “playbook,” based on the region’s experiences responding to the COVID pandemic, for responding to future pandemics or pandemic-like disruptions.
DEGRADATION OF NATURAL RESOURCES

The Mid-Iowa region is rich in natural resources, notably its fertile soil and ample fresh water. However, these resources run the risk of degradation.

• **Soil erosion** occurs when rainwaters carries soil off fields and into streams, sending the region’s fertile soil into streams and rivers and, ultimately, out of the region.

• **Water quality** is negatively impacted by excessive contaminants entering the water stream, making the region’s water more difficult to clean to drinking standards, and presenting a deterrent to recreating in the water.

RESILIENCE STRATEGIES

• Support efforts to preserve and protect natural resources.

• Support efforts to improve wetlands conservation, air and water quality, and reduce flood risk.

• Support development practices that do not affect flood prone or other environmental-sensitive lands.
ADAPTABILITY

Being economically resilient requires adaptability on the part of economic development professionals. To do so effectively, they need to collaborate with key stakeholders, notably the emergency management agencies.

This collaboration is occurring now, and is worth focusing on going forward. Of note, the Hazard Mitigation Plan for Polk County was developed by the staff at the Des Moines Area Metropolitan Planning Organization, the same staff who are working with the Mid-Iowa Planning Alliance.

RESILIENCE STRATEGIES

- Support planning efforts for Hazard Mitigation Plans.
- Include emergency managers in CEDS planning processes.
DISASTER RESPONSE

In the event of a disaster, MIPA is committed to supporting its member jurisdictions and partner organizations in the following ways:

• Provide access to regional demographic, economic, and hazard vulnerability data.
• Assist with disaster assessments and long-term economic impact analysis.
• Foster collaborative relationships among member jurisdictions and partner organizations that could provide data, funding, technical expertise, and other resources essential to intermediate and long-term economic recovery.
• Offer grant writing and technical assistance.
• Connect entities with resources such as EDA’s Revolving Loan Fund, as well as private, nonprofit, and philanthropic resources.
• Provide technical support to impacted businesses.
• Leverage asset.
• Offer neutral forum to discuss the economic-recovery from disaster among diverse stakeholders.
A economy that is resilient requires more than plans and infrastructure – it requires a positive outlook. As such, it is important for leaders of the economy to share a positive vision for the future of the economy.

A positive self-image is a staple of the Mid-Iowa economy, with abundant examples of this kind of story-telling, often from local chambers of commerce and regional economic development groups. Many of these organizations have been involved in MIPA.

Storytelling examples include:

• Relocation guides
• Websites
• Promotion of earned rankings

The following pages provide examples of the kinds of rankings and promotions that feed the Mid-Iowa region’s image of itself as having a prosperous future.
The Greater Des Moines Partnership, with a 10-county service area including 5 of the 7 MIPA counties, is an effective storyteller whose efforts have led to numerous positive rankings for the region and a positive attitude among stakeholders throughout the region.

The Partnership helps position the region to rank highly in national ranking exercises by third-party groups such as national magazines. The Partnership then shares these locally through email, website, meetings, and more.
Capital Crossroads is a regional plan covering a 50-mile radius around the state capital, including all seven counties in the Mid-Iowa region. The Capital Crossroads plan is complementary to the Mid-Iowa Comprehensive Economic Development Strategy.

Moreover, the staff behind Capital Crossroads routinely tell the story of “regional wins,” or successful project or program implementations that support the region’s goals. These are promoted in e-newsletters, online, and in meetings with stakeholders.
There is an abundance of positive story-telling about the Mid-Iowa region, and it will be important for the region to continue this tradition of presenting a positive vision for the future.

**RESILIENCE STRATEGIES**

- Support storytelling efforts by partner organizations.
- Support efforts to highlight positive improvements resulting from investments in projects or programs within the Mid-Iowa region.
- Involve key storytelling stakeholders in efforts being made by MIPA.
6

STRATEGIC VISION & PLAN OF ACTION
The strategic vision for the Mid-Iowa region pulls together the community and stakeholder input from Chapter 4, as well as the data and research from Chapters 2 and 3.
Community Survey

An online survey was distributed to the stakeholders and communities of Mid-Iowa. The survey shared the draft Vision Statement, Goals and Objectives and sought feedback on them. Moreover, the survey looked to the region's stakeholders – from cities and counties, representing public and private institutions – to set priorities among the goals by ranking them. The resulting feedback helped determine the final language here.
Vision statement

Life is pretty good in Mid-Iowa – and we’re working to make it better.

We have housing in a rural or urban setting at relatively low costs – which we want to make and keep affordable for everyone.

We have nation-leading industry clusters, strong companies, and a talented workforce – which we want to nurture, grown, and expand.

We have abundant energy and natural resources – which we want to protect and preserve.

We have a wide-ranging cultural and recreational amenities to attract and retain residents – which we want to expand throughout the entire region.

Building upon these strengths will further distinguish Mid-Iowa as a desirable place to grow a career, raise a family, own a company, invest, and enjoy a high quality of life.
Attract, retain, and expand businesses throughout the Mid-Iowa region.

Objective

Leverage local, regional, state, and federal programs and incentives with the business needs of the region.
GOAL 1 IMPLEMENTATION

Strategies
A. Assist with financial and technical assistance applications to support business and job growth in collaboration with local governments, economic development organizations, and private businesses.

B. Support jurisdictions receiving state or federal awards, which aid business and job growth, in their efforts to fulfill the applicable requirements of the funding agency or program, especially when compliance is necessary to implement the awarded programs or projects. (e.g., environmental reviews, job maintenance, procurement, etc.)

Evaluation indicators
• Jobs created
• Business start-ups and expansions
• Amount/type of assistance provided
Provide the necessary infrastructure to sustain and grow communities and businesses.

Objective

Ensure the region’s infrastructure meets the evolving needs of residents and businesses through planning and financing, with an emphasis on preserving existing facilities and building new when necessary.
GOAL 2 IMPLEMENTATION

Strategies
A. Assist in the regional effort to expand broadband access to every corner of the Mid-Iowa region.
B. Assist local governments, economic development organizations, and industrial foundations with the assembly of land for business and industry, through site identification, mapping, and other technical assistance.
C. Provide local governments – in collaboration with economic development organizations, private businesses, developers and investors – with financial and technical assistance applications to support infrastructure.
D. Help develop strategic plans or infrastructure needs assessment for local governments.

Evaluation indicators
• Priority infrastructure projects funded and implemented
• Underperforming systems addressed
• Communities assisted with comprehensive plans, strategic plans, or infrastructure needs assessments
GOAL 3

Attract, retain, and expand the workforce throughout Mid-Iowa.

Objective

Improve the region’s physical and cultural environment to preserve Mid-Iowa as an affordable and desirable place to live, work, play, and raise a family for a workforce of diverse backgrounds, interests, and skillsets.
GOAL 3 IMPLEMENTATION

Strategies

A. Support local governments and nonprofit community and neighborhood development organizations with applications for financial and technical assistance that support business and job growth, workforce housing, daycare options, and quality-of-life amenities.

B. Assist in efforts to expand a range of appropriate options for workforce housing.

C. Assist governments in sustaining and expanding their tax base, emphasizing downtown districts, entertainment districts, commercial and infill development as appropriate.

D. Search for resources to aid in the redevelopment or adaptive reuse of existing buildings or facilities that have closed due to population loss, relocation, disinvestment, or other circumstances.

Evaluation indicators

• Population growth
• Growth in new housing that accommodates various price points and lifestyle preferences
• Number of new workforce housing units
• Vacant buildings or facilities that are repurposed or redeveloped
• Vacant downtown buildings or districts that have been rehabilitated to occupy commercial/retail businesses
• Addition of public amenities (such as paved trail, water trails, green spaces, and parks, as well as recreational, cultural, entertainment and community facilities)
GOAL 4

Prepare the workforce to the evolving Mid-Iowa economy of today and into the future.

Objective

Provide easy and affordable access to educational opportunities and apprenticeships serving to upskill the workforce, meet the employment needs of the region’s businesses and industries, and prepare for opportunities into future.
GOAL 4 IMPLEMENTATION

Strategies

A. Support local governments and nonprofit community and neighborhood development organizations with applications for financial and technical assistance that support workforce attraction, development and training.

B. Promote existing and proposed programs that educate and train the region’s workforce, with an emphasis on “upskilling” undereducated and low- and moderate-income workers.

C. Assist with regional collaborations involving the institutes of higher learning, including universities, private colleges, and community colleges, that align student training with the demands of the region’s economy.

Evaluation indicators

• Employment rate
• Jobs created and retained
• Programs dedicated to upskilling the workforce
• Programs cultivating talent for the region’s in-demand industries
• Businesses adding employees
Bolster the economic resilience of Mid-Iowa by safeguarding our natural assets and through disaster avoidance and mitigation.

Objective

Prepare and equip local governments and businesses to avoid natural and human-caused disasters where possible, and to sustain and recover from the social and economic disruptions when disasters happen.
GOAL 5  IMPLEMENTATION

Strategies
A. Assist local governments with financial assistance applications and management of programs intended to acquire and remove residential structures and essential facilities from identified flood hazard areas.
B. Promote local and regional efforts to improve wetlands conservation, air and water quality, and reduce flood risk.
C. Support development practices that do not affect flood prone or other environmentally-sensitive lands.
D. Support disaster mitigation planning efforts.
E. Assist economic development organizations in supporting businesses adapting to disaster events and economic downturns.

Evaluation indicators
• Growth or decline of buildings in the 100-year floodplain or other environmentally sensitive areas
• Projects or programs that preserve or re-establish wetlands, improve air and water quality, and reduce flood risk
• Jurisdictions covered by pre-disaster mitigation plans locally adopted and approved by FEMA
• Number of business closures and layoffs
ACTION PLAN: Tactics & Services

Implementation will require specific tactics within three service levels defined by MIPA. The aim of the service levels is to ensure MIPA’s primary tasks are being completed, while seeking to provide the highest level of value to the Mid-Iowa region.

- **Core Services** are the fundamental functions that are expected by MIPA’s member governments and primary federal partner, the U.S. Economic Development Administration.

- **Support Services** are the services that member governments can request of MIPA without prior negotiation; for example, grant administration.

- **Supplemental Services** are “value-adds,” which can be offered to member governments on a case-by-case basis, if they align with MIPA goals and additional funding allows for expanded staff capacity.

The Mid-Iowa CEDS was a collaboration between the public and private sectors, just as economic development is a public-private venture.

Going forward, the continued involvement of stakeholders, communities, economic developers, and MIPA staff as facilitators will be key for effective implementation. Furthermore, MIPA will collaborate on these efforts with neighboring Economic Development Districts, other Economic Development Organizations, and institutions of learning, notably Iowa State University and Des Moines Area Community College.

MIPA staff are responsible for monitoring and updating the Mid-Iowa CEDS. They assume responsibility for regular evaluation of the plan and recommended projects. The plan will be revised every five years to ensure it is up to date, though intermittent updates may be made if changing economic conditions warrant them.

Additionally, MIPA staff will provide services to member governments. These include the writing and administration of grants; serving as a conduit between member jurisdictions and state and federal funding agencies; planning and development services; coordination on regional issues addressing community needs; and other services and projects as requested by member governments.
